**2016 budget approved**

By Lisa Hatfield

The Nov. 10 meeting of the Tri-Lakes Wastewater Facility (TLWWTF) Joint Use Committee (JUC) included discussion and approval of the 2016 facility budget and 2016 appropriation resolutions as well as a decision to have the facility’s property lines surveyed. The JUC directors also heard reports about many recent regional and state water quality control meetings where decisions were made that directly affect the TLWWTF.

**Recent water quality control meetings summarized**

By Lisa Hatfield

The Nov. 10 meeting of the Tri-Lakes Wastewater Facility (TLWWTF) Joint Use Committee (JUC) included discussion and approval of the 2016 facility budget and 2016 appropriation resolutions as well as a decision to have the facility’s property lines surveyed. The JUC directors also heard reports about many recent regional and state water quality control meetings where decisions were made that directly affect the TLWWTF.

**2016 budget approved**

Before the members approved the 2016 budget, Wicklund said two changes were needed. First, he asked that the 10 percent construction contingency amount of $300,000 for the total phosphorus removal tertiary treatment chemical clarifier expansion project’s construction contract be included as a separate construction budget line item. This line item is necessary to fund the chemical storage room emergency generator change order that is being required by the Tri-Lakes Wastewater Fire Protection District fire marshal. The requested line item would also fund any other future unbudgeted construction item change orders for the new clarifier expansion without requiring the board to approve any 2016 facility budget amendments next year.

Second, Wicklund said that the estimated amount that will be spent for construction of the total phosphorus clarifier expansion project in 2015 should be calculated so that the remainder of the construction budget could be placed in these 2016 budget line items.

Plant Manager Bill Burks said he would investigate the final amounts with accountant Jackie Spegele of Numeric Strategies LLC and include them in the final 2016 budget. He added that all of the $1 million state nutrient grant will be spent by the end of 2015, about $788,000 in 2015, and only about $33,000 will have been invoiced to the three owner districts for their separate 2016 district budgets. The remainder of the construction will now be paid for entirely by the three owner districts.

The board voted unanimously to approve the 2016 budget with the note that Burks would make those two changes. Then the members unanimously approved the 2016 budget as amended for these two changes. These approvals will allow each of the three owner districts to finalize their separate 2016 district budgets and appropriations line items for the TLWWTF.

Council report and more

MSD environmental compliance coordinator Jim Kendrick reported on many related regional and state meetings he attended recently in his role as consultant to the JUC. His report noted that Brown and Caldwell environmental engineer Sarah Reeves, who serves as the coordinator of the Colorado Monitoring Framework (CMF) and Arkansas and Kansas and Fountain Coalition for Urban River Evaluation (AF CURE), environmental attorney Tad Foster, and environmental attorney Gabe Racz of Vranish & Raisch, LLP, were and Reeves and Pueblo West environment attorney Connie King were witnesses at the Oct. 13 Information Hearing of the Water Quality Control Commission (WQCC) in Denver (www.colorado.gov/pacific/cwlref/wqcc-october-13-2015-agenda). The topic was the final review of the Nutrients Management Control Regulation 85 (5 CCR 1002-85) and section 31.17 of the Basic Standards and Methodologies for Surface Water Regulation 31 (5 CCR 1002-31) as well as the Administrative Action Hearing to consider approval of the Water Quality Control Division’s proposed 2016 Intended Use Plans for the Water Pollution Control Revolving Fund and the Drinking Water Revolving Fund.

Kendrick stated that these and other witnesses who presented nutrient, temperature, E. coli, and other data convinced the WQCC to consider delisting or extending several pending new tighter future requirements in these two regulations before approving their renewals. The witnesses said the tighter existing total phosphorus...
